

Digital Literacy II - Final Project

You will be creating a digital portfolio that will demonstrate some of the skills used during this course. The final product will be presented to the class.

What is a digital portfolio?

A computerized collection of student work.

What do I put in my portfolio project?

Choose at least **three** ideas from the list below. This will be original work you are creating and not just versions of past assignments.

- Python Trinket
- Spark Video
- Pixlr or Photoshop type of graphics work
- Photography
- Musical Recording
- Fake News
- Tech topic using Timeline JS
- Screencast
- Infographic
- Survey
- Other options - possibly *(If you have an idea then let's talk about it first)*

What do I need to do with my three projects?

You will present your portfolio to the class. Keep in mind that a portfolio is usually an item or space that holds work examples. Depending on what your projects are, there can be several ways to make them accessible.

I have my ideas - now what?

- Complete a proposal in your Google Drive folder for this class.
- Explain each project you are choosing, why you picked it, and what you intend to create
- Be detailed enough to be sure the projects will be worthy of counting as a final assessment
- Think about the method you will use to present your projects to the class
